COMPANY OVERVIEW

Ready Front Solutions (Ready Front Contractors LLC) is a service-disabled veteran-owned IT consulting company specializing in AI integration. We design, build, integrate and modernize business technology: custom software and mobile applications, cloud and data infrastructure, systems integration, workflow automation and practical AI, delivered with testing, audit trails and human approval built in.

CORE COMPETENCIES

- **Custom software and applications**: web platforms, portals, internal tools, native iOS and Android apps on one backend
- **Systems integration and modernization**: APIs, legacy replacement in safe stages, data consolidation
- **Cloud, data and infrastructure**: data ingestion and normalization, governed public and internal data lanes, audits against source
- **Business automation**: scheduled jobs with deduplication and controlled retries, document generation, sequential multi-party e-signature with audit trail
- **AI integration**: AI voice receptionist, natural-language and bilingual (English/Spanish) search with deterministic validation, AI assistants with human approval
- **IT strategy and architecture**: assessment, target architecture, phased roadmaps, security and data-ownership planning

PAST PERFORMANCE (COMMERCIAL)

Ready Front Real Estate (Texas brokerage of affiliate Ready Front Consulting LLC, same owner): complete technology platform, designed, built and operated in production since November 2025 by our principal, who performs our work: website, iOS and Android apps, CRM, data pipelines, communications, e-signatures and AI. Measured results:

- Slowest search path rebuilt from 22.8 s to 0.9 s; app home screen p95 from 29 s to 0.8 s under 50 concurrent users, 0.00% failed requests across 7,071
- Data audit: financing filter coverage raised from 47% to 100% of qualifying records; 10,345 of 10,345 in exact agreement with source, zero contradictions
- Account activation flow passed 23 of 23 verification checks; access isolation 10 of 10
- Voice search tested against 1,456 sentences built from real records, English and Spanish

DIFFERENTIATORS

- Service-disabled veteran-owned; we build and run what we deliver
- AI with guardrails: validation, logging and human approval before anything acts
- Fail-closed engineering: systems refuse to act on unmapped or unverified data rather than guess
